

The National Association of Hungarian Dismantlers

The National Association of Hungarian Dismantlers (GOE) was established in 2003. The owners and members are both domestic private individuals. The main activities of the Association are the following: establishing works and ensuring the information regarding the operation by deepening the existing working-relationships with the competent governmental organisations, partner-allies and authorities. The Association takes sides by considering the members' opinions and also makes proposals regarding those decisions and drafts of new law elaborated by governmental organs, which are presented in its speciality – particularly to drafts which should be corresponding with the basic rules of EU directives concerning the establishment and operation of such demolishing works. The members are ordinary or supporting ones. At present the Association has 28 ordinary and 1 supporting member. The GOE was established by its affiliated organisations for special goals, such as to utilize the benefit originating from the association-form, to the protection and representation of its interests, to the mutual supportment of each other, to co-operate in research projects and in popular education as well, to prevent or eliminate the harmful effect on health and environment and finally for the safety of traffic. The main activities are to receive and demolish vehicles or any part of vehicles which are withdrawn from the circulation for good, the representation of those private individuals and legal entities ahead of governmental, local authorities and other organisations and in the territory of the EU, who cooperate on the operation of such works, restore or cooperate in restoring the demolished materials or garbage either in a temporary or a permanent way. The development of co-operation with hungarian and foreign partner-organisations to exercise the interests of members is also a crucial goal beside the abovementioned ones. Just as to cultivate and preserve the purity of the profession. In the course of business the Association represents the interests of the members. The trust of other domestic demolitioners and the protection of their interests in case of appropriate, regular operation.
